Subject: Please take a second to listen to my request....

Please take a moment to listen to my request to remove Fluoride from our drinking water. I do not want it in my or my children's water. There are other ways to get Fluoride for those who want it and its not expensive. Please don't make us all drink it, it should be my choice to medicate my self and my children. Please as a long time born and raised Windsorite I beg you to make our water safer for all and stop poisoning us who do not want to drink it.
