Subject: hold the fluoride

Dear Sir,

I was born and raised in Windsor (1950) and in 1984 we moved to LaSalle, so my entire life my family and I were force fed fluoride through the Windsor water program. I want this to stop. There are just too many things that we can do to become healthier and this is a no brainer- and it will save us money. Why would anyone put so much effort into purifying water to turn around and dump pollutants into it? Please vote against the continuation of polluting our clean water. There are so many ways that your citizens could add fluoride to their diet if they really wanted to ingest it, without making us all participate. To me it's the same as making us eat in smoke filled restaurant 3 times a day, every day of our lives.

Thank you,

Kathryn Oppio
