It is my understanding that there is a possibility that Windsor may be the second of three communities, after Tecumseh, to recommend removing fluoride from our drinking water. I am a resident of Tecumseh and am strongly in favour of keeping our water safe, by keeping fluoride in our drinking water.

Since, this is a complicated issue requiring a combination of technical information, and insightful, intelligent reasoned opinions, I defer to those, like our medical officer of health.

Thank you for considering this opinion

Michael Brennan
