

Tulip Tree

Liriodendron tulipifera

Hardiness Zone	5
Mature Height	75-100 feet
Mature Form	Oval with a narrow crown
Features	Unusual leaves shaped somewhat like a stylized tulip and which turn a clear yellow in autumn; orange tulip-like flowers in spring; very straight trunk with light gray bark
Insect or Diseases	Verticillium wilt, leaf spots and powdery mildew; also aphids and scale
Culture	Full sun; needs a soil that has a consistent supply of moisture; prefers slightly acid soil, but is somewhat pH adaptable
Notes	This tree suffers from leaf yellowing (a physiological disorder) when planted in dry sites; best to avoid street plantings unless a large soil mass is available to provide adequate moisture.

Size

Exposure

Tolerance

Wind	No
Wet Sites	No
Dry Sites	No
Alkaline Soil	Yes
Salt	No
Air Pollution	No
Soil Compaction	No

Uses

Windbreak	No
Street	No
Specimen	Yes
Shade	Yes
Massing	No
Screen	No
Patio	No
