**Section 1 Project Details**

Date Submitted: June 19, 2013

Department: Ron Jones, Operations Department, Parks and Facilities

- 1) Description of Barrier Removal Project and how it promotes universal access to all persons with disabilities (include appropriate references to attitudinal, informational, physical, technological, architectural or policy barriers):**

Paterson Park is located on the corner of Detroit Street and Sandwich Street and it is currently a very under utilized park space. The intention is to make this park usable and used by adding accessible paths throughout the park, accessible picnic tables on concrete pads as well as bbq's for residents and visitors to the park.

- 2) Provide a list of users and groups that will benefit from this barrier removal activity:**

This new park and pathway design will benefit all visitors to this park. The wonderful thing is that its design was put together with the goal of accessibility for all as the desired goal. Accessible picnic tables situated on concrete pad(s) and accessible paths throughout the park make this a wonderful spot for the clients at the Assisted Living Southwestern Ontario, which is located just up the street, from the park.

- 3) Identify all partners in this project:**

Ron Jones, Operations Department, Parks and Facilities

- 4) Identify in kind and volunteer contributions:**

This project is being spearheaded by Ron Jones who is offering a substantial donation towards the park enhancements and accessible features. Ron Jones will provide details of his contribution at the June 20<sup>th</sup> meeting.

- 5) If this is for a modification to the built environment, has your site been audited for accessibility using the Windsor Barrier Free Design Standards?**
