

Building and Public Works Permit Inquiries
From
City of Windsor Web Site

City Web Site - www.citywindsor.ca

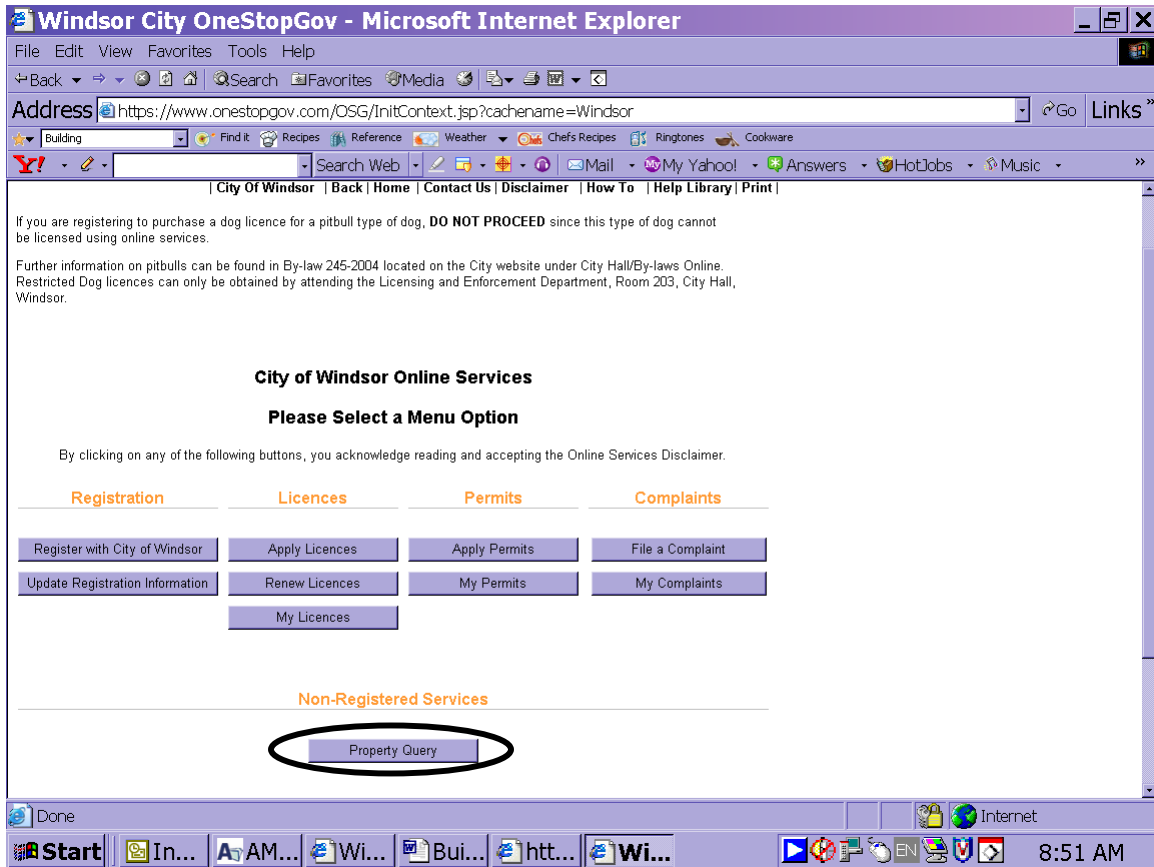

This information shows how anyone can get basic status of Building and Public Works permits through the City of Windsor Web Site.

In the future, these screens will show any violations on the site.

The information is limited by privacy constraints. Any zoning information or exact status should be confirmed in writing by the Building and Development or Public Works Department.

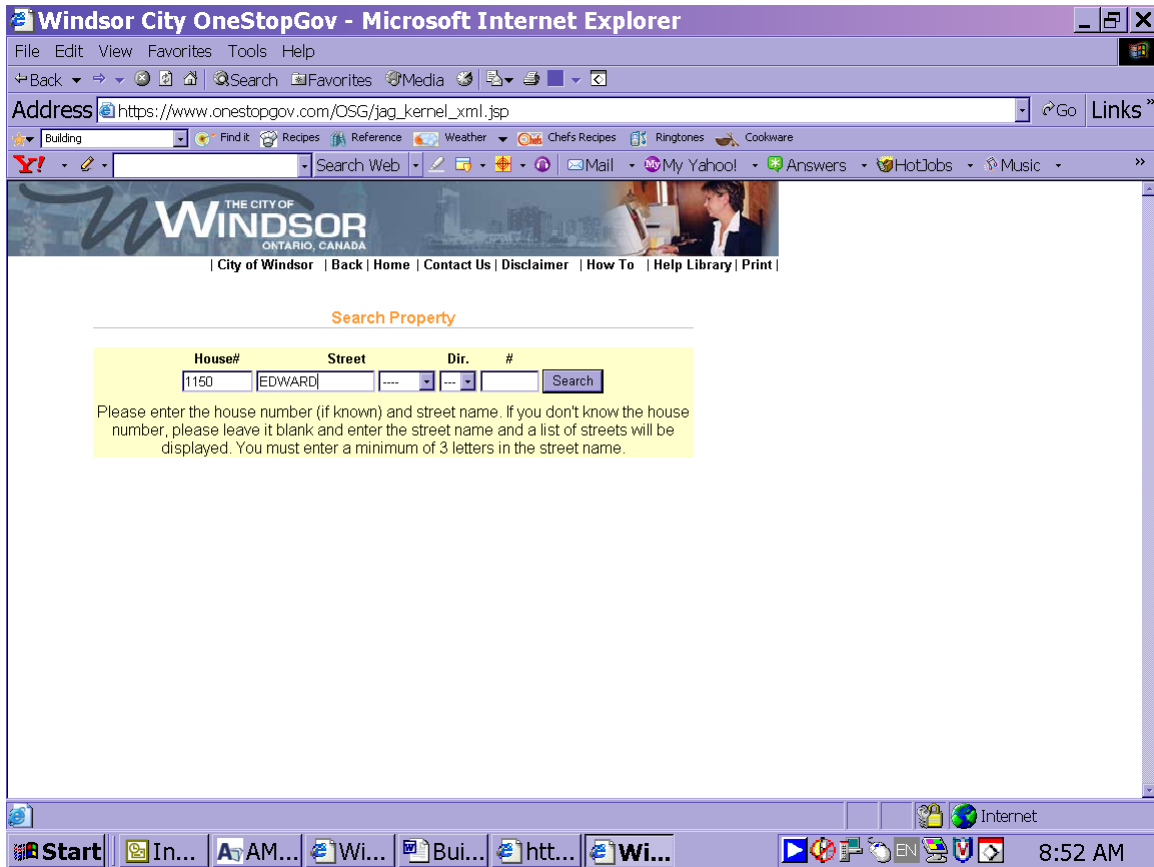

To review Property and Zoning information
Click on **“E Services”** and **“Building Permit Inquiries”**

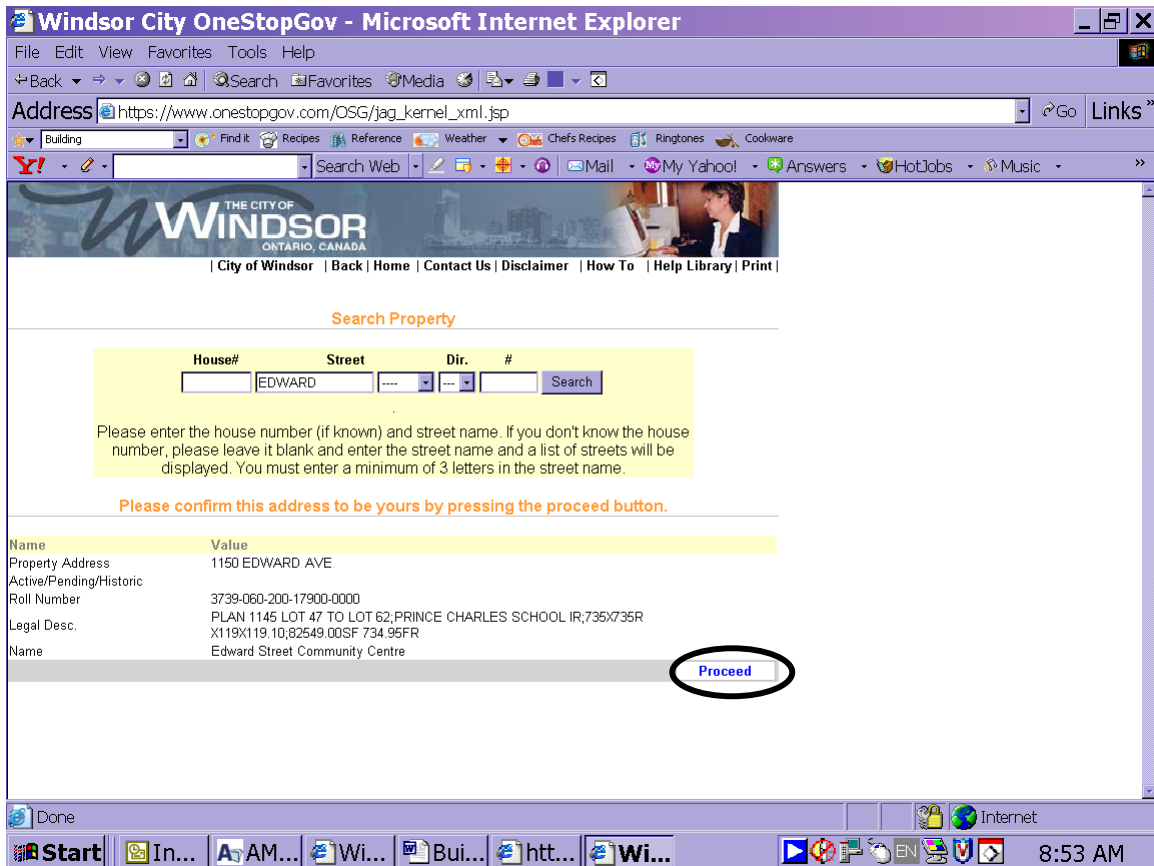

Click on “**Property Query**” in the Non Registered Services section of the screen.

Continue by typing in the address of the property in question and click on **Search**.

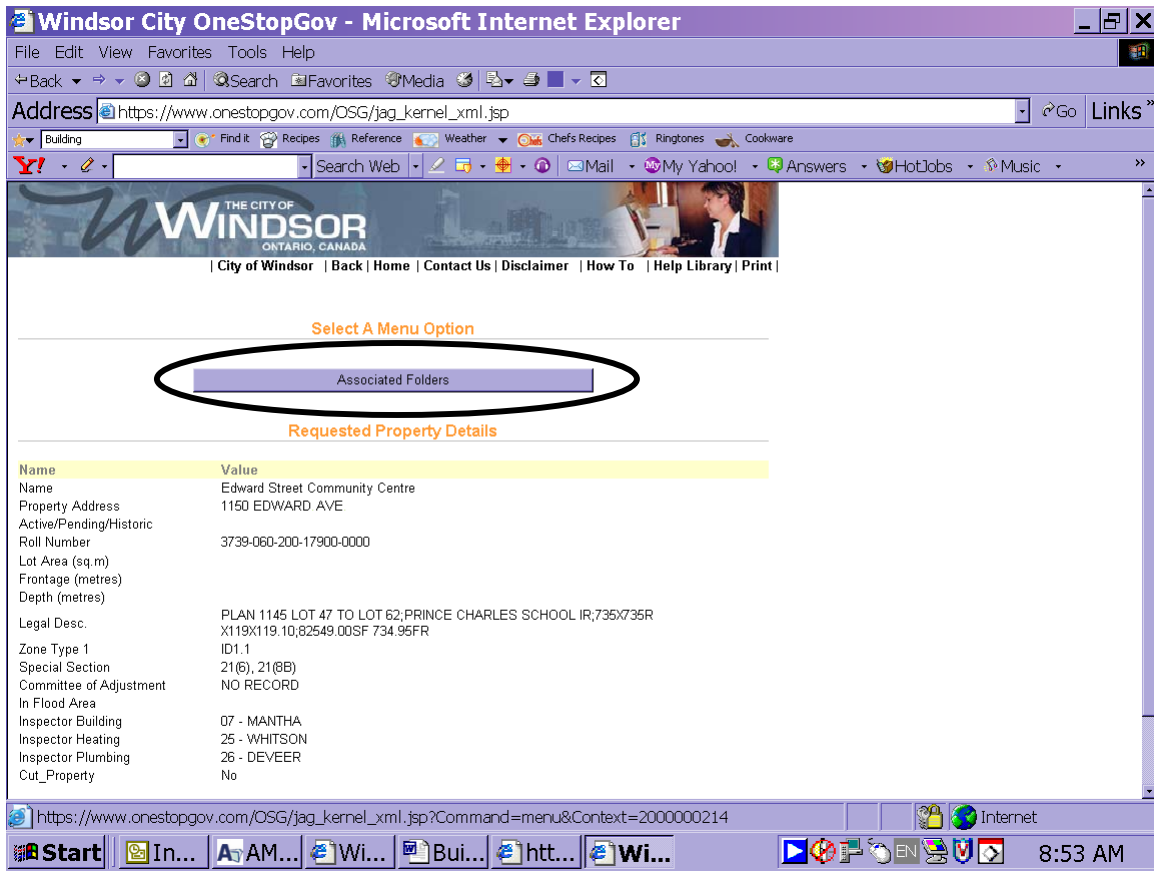

A screen will appear, giving the property address, the roll number and the legal description. (see next)

Click on “**proceed**” for more detailed information regarding the property, such as property size, zoning and inspectors for that property.

Please note that zoning designation should always be confirmed with the Building Department.

Click on “Associated Folders”.

The “associated folders” are the permits for that property. This screen indicates all permits that were issued (i.e. – construction, sign, demolition, sewer, etc.) and the status of that permit.
