

Ice Cream Cone Seed Planting

WHAT YOU WILL NEED:

- Ice cream cones
- Soil
- Seeds
- Spoon
- Container

WHAT TO DO NEXT

1. Fill the cone with soil.
2. Press the seed of choice in soil and then cover with more soil.
3. Place the cone upright in a container.
4. Add a tiny bit of water, just enough to lightly wet the soil, and place in sunlight.
5. Watch it grow!
6. When the seedlings begin sprouting and are ready to be planted in a garden bed outside, dig a hole in the garden and place the cone right in. The cone is biodegradable and can be planted!
